

Taking your **SuperOffice**
to the next level

Expander Design Suite

For **SuperOffice CRM 5**

Expand with additional Tabs and Tables, create your own searches and use both external and internal data in your templates

Expander Design Suite can be considered as a large toolbox, which will enable you to build even more functionality into SuperOffice CRM 5, and this is even done without any programming.

You can show external (ERP data etc.) as well as internal SuperOffice CRM 5 data, in the new extra Tabs on "Contact", "Project", "Sale", "Appointment", "Document" and "Person".

Expander Design Suite offers the possibility to create additional tables in the SuperOffice CRM 5 database. Data can be added and edited, even when you are on travel.

We have now even developed a series of standard solutions to

Searching

With the Design tool you can create advanced searches. You can search for all combinations of data in the SuperOffice database, combined with data from external data sources (ERP data etc.). E.g. you can make a search, such as 'create a selection on all companies with a sales forecast with probability of 80%'.

The result can then be transferred to either a new or an existing 'Selection' in SuperOffice CRM 5.

Technique

The configuration and installation of the module is done without using programming. However it is required that SuperOffice CRM 5 run on a SQL, MS-SQL, Sybase or Oracle database, and that data, which is to be available on the tabs can be collected via ODBC.

Templates

The Template Expander option makes it possible to expand your standard SuperOffice CRM 5 templates, to include data from external data sources (ERP data etc.) or internal data from the new tables in SuperOffice CRM5.

Adaptable Solutions

We often see that the demands for software are changing over time. That is why we have made it possible to buy additional functionality to the Expander Design Suite as the demands arise.

System requirements

Minimum SuperOffice CRM 5 v5.6 - SR-2

Standard solutions

The following standard solutions are for now. Each with the possibility to be expanded.

- Product Views
