

SuperOffice TimeLink

What is timelink ?

TimeLink is a tool developed to ease the work related to filling out timesheets. By registering activities in the SuperOffice Diary, TimeLink will give exact report of time related to; customer, activities, projects, number etc.

The program presents all the data directly in Excel, and gives you the possibility to customize your own Excel templates – including variable hour rates, inclusion of travel costs etc. etc..

TimeLink include the small program; Clock which assist you in register the activities directly in your diary with the right duration

What are the benefits ?

Does the people in your company spend a lot of time developing time sheets ? Are they sometimes rejected, or need rework due to inaccuracies? Do people spend time filling in time sheets for customer approval, and ALSO fill in other sheets with the same information for internal review purposes?

If you answered yes to any of these questions, the benefit of timelink are less time spent on administrative work, more time spent on productive work, happier customers, and an improved bottom line.

If you register your work in SuperOffice you will profit from:

1. Better control of all activities in your Company.
2. Flexible TimeLink reports; Provides you with the supporting documentation the customer needs for approval for invoicing.
3. Create valuable history in your CRM system. Have full history of customers and projects.
